Davin Jonathan Tanus

AI Engineer Intern | Machine Learning & Software Engineering

Surabaya, Indonesia • +62 821-9465-5321 • davinjtanus@gmail.com • LinkedIn • GitHub • Portfolio

PROFESSIONAL SUMMARY

Information Systems undergraduate (GPA 3.64/4.00) and AI Engineer Intern with hands-on experience building document-intelligence, machine-learning, data, and full-stack systems. Delivered internal applications with Next.js, FastAPI, Go, relational databases, and Docker; developed evaluated solutions across computer vision, Indonesian NLP, RAG, and time-series forecasting. Combines rigorous model evaluation with maintainable, product-oriented engineering.

PROFESSIONAL EXPERIENCE

AI Engineer Intern — PT Salam Pacific Indonesia Lines

2026 – Present

Applied AI & Full-Stack Engineering

- Develop and integrate an internal document-intelligence platform that transforms operational PDFs into structured, searchable records and supports automated cross-document verification.
- Contribute full-stack features to a talent development and assessment platform spanning competency profiles, learning activities, analytics, and report generation.
- Build secure application flows and REST APIs across Next.js, FastAPI/Python, Go, PostgreSQL/MySQL, and Docker-based environments.
- Write automated tests and collaborate with engineering stakeholders while protecting confidential company data and implementation details.

EDUCATION

Institut Teknologi Sepuluh Nopember (ITS)

Aug 2023 – Present

Bachelor's Degree in Information Systems | GPA: 3.64/4.00

SELECTED PROJECTS

BISINDO Fingerspelling — In-Browser Sign Language Recognition

Live demo | GitHub

- Built a real-time recognizer for the 26-letter Indonesian Sign Language alphabet: a 2.6M-parameter YOLO11n detector exported to ONNX and run fully client-side with ONNX Runtime Web on GitHub Pages.
- Found train/validation leakage in the public dataset (63% near-duplicate validation images) and re-split by perceptual-hash groups; reached 98.5% top-1 on a held-out test set and 93.6% on an unseen signer, with per-letter failure analysis against YOLOv8n, landmark-SVM and DINOv2 baselines.

Multi-Class Image Classification with Transfer Learning

Project details | Training notebook (.ipynb) | Evaluation preview

- Trained a 10-class MobileNetV2 transfer-learning model on 13,394 Imagenette images using an 80/10/10 split, augmentation, staged fine-tuning, and checkpointing.
- Achieved 91.67% test accuracy and exported the trained model to SavedModel, TensorFlow Lite, and TensorFlow.js formats.

Indonesian App Review Sentiment Analysis

Project details | Training notebook (.ipynb) | Evaluation preview

- Built a three-class Indonesian sentiment pipeline from 16,000+ independently collected app reviews, including cleaning, slang normalization, deduplication, and class balancing.
- Benchmarked LinearSVC, logistic regression, and a PyTorch BiLSTM; the strongest evaluated model achieved 92.17% test accuracy with per-class and confusion-matrix analysis.

SELECTED PROJECTS — CONTINUED

RAG Academic Assistant Live application | GitHub

- Built a Retrieval-Augmented Generation assistant over 30+ university regulation documents, with semantic search over pre-computed sentence-transformer embeddings, Streamlit, and an LLM API.

Stock Price Forecasting — Classical ML, Deep Learning & Chronos-2
Classical notebook | Chronos-2 notebook

- Developed an end-to-end forecasting workflow on 10 years of UNTR.JK data and compared ARIMA, Prophet, XGBoost, LSTM, and the zero-shot Amazon Chronos-2 foundation model.
- Applied rolling walk-forward validation and residual diagnostics; the custom LSTM achieved 1.04% MAPE and 254.56 MAE.

Conduit CI/CD Pipeline on Google Cloud Platform GitHub

- Containerized a Laravel application with Docker and implemented automated test and deployment workflows using GitHub Actions, Google Cloud Run, and Artifact Registry.
- Integrated MongoDB, PHPUnit quality gates, secrets handling, and Grafana-oriented monitoring.

AssetHub — Web & Mobile Asset Management Live web application | Mobile GitHub

- Developed web and mobile workflows for asset tracking, maintenance, assignments, audit logs, analytics, and role-based access using React, Supabase, and React Native/Expo.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, Go

AI & Machine Learning: TensorFlow, PyTorch, scikit-learn, XGBoost, NLP, RAG, computer vision (YOLO), transfer learning, LSTM/BiLSTM, time-series forecasting, model deployment (ONNX Runtime Web, TF Lite, TF.js)

Application & Data: Next.js, React, FastAPI, Streamlit, REST APIs, PostgreSQL, MySQL, Supabase, data preprocessing

Cloud, DevOps & Analytics: Docker, GitHub Actions, Google Cloud Platform, AWS, Microsoft Fabric, Power BI, Git

SELECTED CERTIFICATIONS

Deep Learning Fundamentals — Dicoding Indonesia, Sep 2026

Data Science with Microsoft Fabric — Dicoding Indonesia, Aug 2026

Building Generative AI Applications with Microsoft Azure — Dicoding Indonesia, Aug 2026

LangChain Academy Foundations: LangChain, **LangGraph**, and **LangSmith Deployment** — Aug 2026

Cisco DevNet Associate — Cisco Networking Academy × ITS, Jul 2026

AWS AI Academy — Basic & Beginner — Dicoding × AWS Training and Certification, Aug 2026

Prompt Engineering for Software Developers — Dicoding Indonesia, Jul 2026

View the complete credential and learning-activity archive

LEADERSHIP & ACHIEVEMENT

Intern Staff — Himpunan Mahasiswa Sistem Informasi (HMSI) ITS Sep 2024 – Dec 2024

2nd Place — Information Systems Programming Competition 2024
