Davin Jonathan Tanus

AI Engineer Intern | Machine Learning & Software Engineering

Surabaya, Indonesia • +62 821-9465-5321 • davinjtanus@gmail.com • LinkedIn • GitHub • Portfolio

PROFESSIONAL SUMMARY

Information Systems student at ITS (GPA 3.64/4.00, graduating August 2027) and AI Engineer Intern building internal tools for fleet fuel analytics, LLM-based CV screening, assessment analytics, and document verification with Next.js, Go, FastAPI, Laravel, and Docker. Takes machine-learning projects from raw data to a live demo, with careful evaluation: found and fixed data leakage in a public sign-language dataset before reporting results. Thesis on pediatric pneumonia classification from chest X-rays.

PROFESSIONAL EXPERIENCE

AI Engineer Intern — PT Salam Pacific Indonesia Lines

Jul 2026 – Nov 2026

Performance Excellence Division | Applied AI & Full-Stack Engineering

- Largest contributor to a fleet fuel (bunker) dashboard: built the analysis of vessel noon reports by route, speed, engine, and reefer load, plus data checks that flag missing or inconsistent reports.
- Rebuilt an LLM-based CV analysis module into two recruiter workflows: one CV matched against all roles (fit score, skill gaps, interview questions) and many CVs ranked for one role.
- Built a DISC assessment analytics dashboard, and a document-verification engine that turns fleet route-plan PDFs into structured records and cross-checks them.
- Integrated apps with the company SSO and added account management to the SSO portal; Next.js, FastAPI, Go, Laravel, PostgreSQL/MySQL, Docker, automated tests, confidential data.

EDUCATION

Institut Teknologi Sepuluh Nopember (ITS)

Aug 2023 – Aug 2027 (expected)

Bachelor's Degree in Information Systems | GPA: 3.64/4.00

- Thesis (in progress): classifying bacterial and viral pneumonia in pediatric chest X-rays with RDNet-Tiny, compared against DenseNet121 and ConvNeXt-Tiny, with a Flask web app showing Grad-CAM.

SELECTED PROJECTS

BISINDO Fingerspelling — In-Browser Sign Language Recognition

Live demo | GitHub

- Built a real-time recognizer for the 26-letter Indonesian Sign Language alphabet: a 2.6M-parameter YOLO11n detector exported to ONNX and run fully client-side with ONNX Runtime Web on GitHub Pages.
- Found train/validation leakage in the public dataset (63% near-duplicate validation images) and re-split by perceptual-hash groups; reached 98.5% top-1 on a held-out test set and 93.6% on an unseen signer, with per-letter failure analysis against YOLOv8n, landmark-SVM and DINOv2 baselines.

Indonesian App Review Sentiment Analysis

GitHub

- Classifies 10,674 self-collected Gojek reviews labelled by stars: 91.8% accuracy (macro-F1 0.918) for positive vs. negative on 2,009 held-out reviews, against a 52.9% majority baseline.
- Re-evaluated my own course project and found its labels used the review text and dropped hard cases; published the honest per-class results, error analysis, and a CI-checked evaluation.

RAG Assistant for the ITS Academic Regulation

Live demo | GitHub

- Answers questions from the official 57-page regulation with Pasal, ayat, and page citations: OCR-tolerant chunking of all 91 articles, BM25 + multilingual-e5 hybrid search, and server-side citation checks.
- Evaluated on a frozen 70-question set: retrieval MRR 0.84 (keywords alone 0.80) and 10/10 out-of-scope questions refused; FastAPI, quantised ONNX (285 MB RAM), Docker, pytest, and a CI quality gate.

SELECTED PROJECTS — CONTINUED

Conduit CI/CD Pipeline on Google Cloud Platform GitHub

- Containerized a Laravel application with Docker and implemented automated test and deployment workflows using GitHub Actions, Google Cloud Run, and Artifact Registry.
- Integrated MongoDB, PHPUnit quality gates, secrets handling, and Grafana-oriented monitoring.

TECHNICAL SKILLS

Languages: Python, Go, JavaScript, TypeScript, SQL, HTML, CSS

AI & Machine Learning: TensorFlow, PyTorch, scikit-learn, XGBoost, NLP, RAG (hybrid search, LLM evaluation), computer vision (YOLO), transfer learning, LSTM/BiLSTM, time-series forecasting, model deployment (ONNX Runtime Web, TF Lite, TF.js)

Application & Data: Next.js, React, FastAPI, Streamlit, REST APIs, PostgreSQL, MySQL, data preprocessing, Excel, PowerPoint

Cloud, DevOps & Analytics: Docker, GitHub Actions, Google Cloud Platform, AWS, Microsoft Fabric, Power BI, Git

SELECTED CERTIFICATIONS

Deep Learning Fundamentals — Dicoding Indonesia, Sep 2026

Data Science with Microsoft Fabric — Dicoding Indonesia, Aug 2026

Building Generative AI Applications with Microsoft Azure — Dicoding Indonesia, Aug 2026

LangChain Academy Foundations: LangChain, **LangGraph**, and **LangSmith Deployment** — Aug 2026

Cisco DevNet Associate — Cisco Networking Academy × ITS, Jul 2026

AWS AI Academy — Basic & Beginner — Dicoding × AWS Training and Certification, Aug 2026

Prompt Engineering for Software Developers — Dicoding Indonesia, Jul 2026

View the complete credential and learning-activity archive

LEADERSHIP & ACHIEVEMENT

Scrum Master — Agile Snacklicious (Agile Project Management course) 2024

- Led a six-person team through four sprints: daily scrums, retrospectives, task division, and budget tracking.

Intern Staff — Himpunan Mahasiswa Sistem Informasi (HMSI) ITS Sep 2024 – Dec 2024

2nd Place — Information Systems Programming Competition 2024
