About Me

I am a results-oriented individual with expertise in Dashboarding and Agile-based project management. I have hands-on experience in processing and visualizing data for business needs. Accustomed to working under tight deadlines, I am collaborative and communicative in team environments.

Education & Organization

Aug 2023 – Present Bachelor's Degree, Institut Teknologi Sepuluh Nopember (GPA: 3.64) – Information Systems

Sep 2024 – Dec 2024 Intern Staff – Himpunan Mahasiswa Sistem Informasi (HMSI) ITS

Project Experience

- **[Visualization Dashboard – BCA](#)**: Developed an interactive Power BI dashboard for real-time monitoring of banking performance metrics (using dummy data).
- **[Project Lead – Agile Snacklicious](#)**: Led culinary business operations using Agile methodology (Scrum/Kanban) and Sprint Planning.
- **[Cluster Analysis](#)**: Segmented a **banana quality** dataset into distinct maturity profiles, optimizing cluster consistency with V-Measure Score using K-Means, PCA, and KNNImputer.
- **[Data Warehouse \(ETL\)](#)**: Designed Star Schema architecture and Incremental ETL with implementation of SCD Type 0, 1, and 2.
- **[Computer Vision](#)**: Implemented facial recognition (MobileNetV2) and hand gesture control using OpenCV and MediaPipe.
- **[Risk Analyst – PT Semen Gresik](#)**: Identified operational risks through FMEA (RPN) method based on ISO 31000 standards.
- **[Strategic Planner – TDC ITS](#)**: IS/IT strategic planning, application portfolio analysis, and organizational decision documentation.
- **[Asset Management System \(Website & Mobile App\)](#)**: Developed a website and mobile application for asset management, featuring asset tracking, inventory management, user authentication, and real-time data synchronization to improve operational efficiency.
- **[RAG Academic Assistant](#)**: Developed and deployed an AI-powered academic chatbot using Retrieval-Augmented Generation (RAG) to answer student questions from university academic regulations through semantic search and LLM-based responses.
- **[Stock Price Forecasting with ML, Deep Learning & Chronos-2 Models](#)**: Developed an end-to-end stock forecasting system using 10 years of historical UNTR.JK trading data. Evaluated classical statistical models (ARIMA, Prophet), machine learning (XGBoost), deep learning (LSTM), and Amazon Chronos-2 Foundation Model using rolling walk-forward validation. Performed residual diagnostics and model evaluation, achieving 1.04% MAPE with a custom LSTM while benchmarking against zero-shot foundation model forecasting.
- **[Conduit — CI/CD Pipeline on Google Cloud Platform](#)**: Built and deployed a containerized Laravel application using Docker, GitHub Actions, Google Cloud Run, and MongoDB. Implemented automated testing, deployment, and monitoring workflows to improve software delivery reliability.

Courses / Certificates

- [Software Engineer Intern – HackerRank \(2025\)](#)
- [SQL \(Basic\) Certificate – HackerRank \(2025\)](#)
- [2nd Place Programming](#) – IS Competition, HMSI ITS (2024)
- [Introduction to SAP S/4HANA with GBI 4.2 – SAP University Alliances \(2024\)](#)
- [Intro to Data Analytics – Revou Mini Course \(2025\)](#)
- CCNA: Introduction to Networks by Netacad (In Progress)
- DevNet Associate (DevOPS - In Progress)
- The Data Analyst Course: Complete Data Analyst Bootcamp by Udemy

Skills

- **Data & Analytics:** SQL (MySQL, DuckDB), Python, K-Means Clustering, PCA, ETL Pipeline, Data Warehousing (Star Schema, SCD), Time Series Forecasting, Data Visualization, Data Cleaning & Preprocessing, Data Modeling, ARIMA, Prophet, Holt-Winters (TES).
- **AI & Vision:** Computer Vision, OpenCV, MediaPipe, Face & Gesture Recognition (MobileNetV2, Haar Cascade), Machine Learning, Deep Learning, XGBoost, LSTM, Retrieval-Augmented Generation (RAG), Semantic Search, Large Language Models (LLM).
- **Tools & Software:** Power BI, SAP S/4HANA, GitHub, BPMN, Odoo, Excel, Postman, Packet Tracer, Google Cloud Platform, Git, Jupyter Notebook, Visual Studio Code.
- **Management & Systems:** Agile Scrum/Kanban, Risk Management (FMEA, ISO 31000), IS/IT Strategic Planning, Sprint Planning, Business Process Analysis.
- **Soft Skills:** Professional Communication, Teamwork, Problem Solving.
- **Programming Languages:** JavaScript, Python, SQL.
- **Web Technologies:** HTML, HTMX, CSS, Vite, Streamlit, Laravel.
